## ColorKote

Super-Paint  
1000 year paint?

The Super-Paint of the future has ARRIVED!!  
Is this the very first thousand year (1000 years) paint?  
(What paint was used by the Egyptians in the Pyramids?)

# ColorKote

We have formulated the future of coatings before its time, seeing is believing!

NO OTHER paint is anything like this!

ColorKote is much more than a paint, it is a full protective coating in a maze of astounding colours.

A paint that has the potential of everlasting life, it is self-cleaning, will not fade, is UV stable, with tremendous opacity and flexibility.

DON'T PAINT IT - KOTE IT

IT MAY APPEAR TO BE PAINT  
BUT  
BEAUTY IS IN THE EYE  
OF THE BEHOLDER!

BEAUTY AND PERFECTION!

WHY SETTLE FOR LESS?

NOT a Paint no!!!

Protective Coating?

YES!!!

# I M A G I N A T I O N

Being one of the best 'paints' developed for interior and exterior uses ColorKote is the preferred choice of most contractors

ColorKote, our best protective coating, comes in all sorts of colours

The only limitation is your imagination

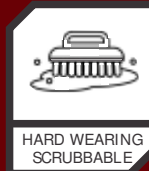

# ColorKote In A Flash

## SPREADRATE/ COVERAGE

ColorKote covers more than 8 square meters per liter per coat

\* Depends on the absorbency of the surface

## SELF CLEANING

This clear product is scrubbable and 100% self cleaning making easy to maintain both indoor and outdoors

## PROTOCOL

The ColorKote product will only be effective if you apply no less than 3 coats. You can apply each coat 1 hour apart in good warm weather

## THE TOOLS

ColorKote is a water based product, meaning the only liquid you need to clean your paintbrush, roller or spray machine is water

## PROPERTIES OF COLORKOTE

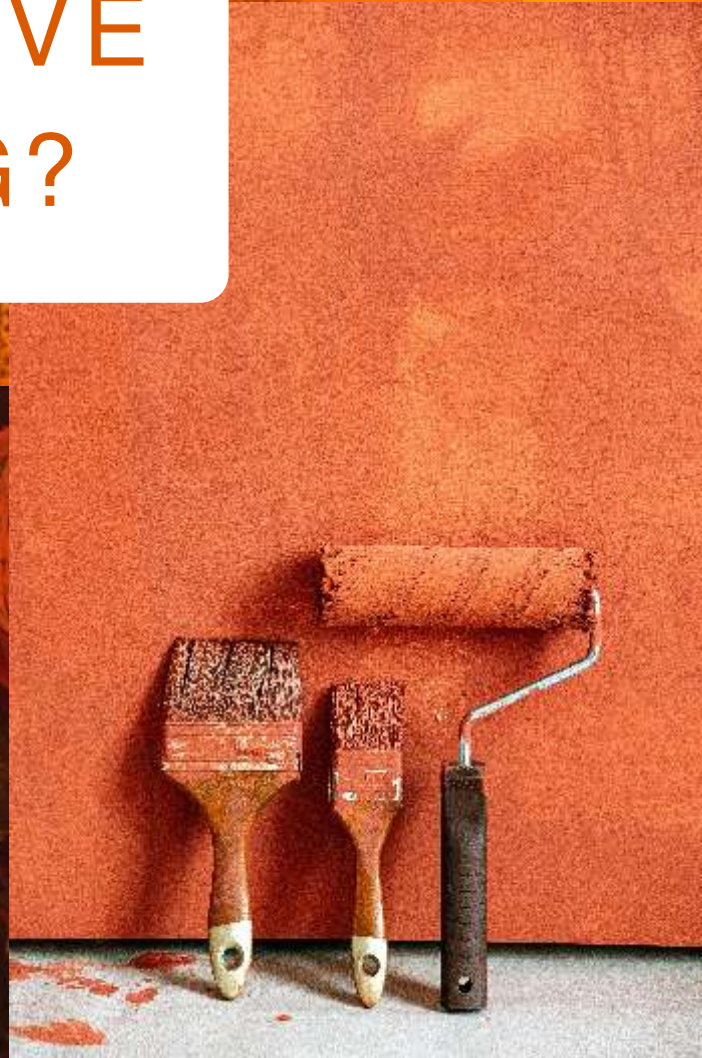

ColorKote is an eco-friendly, UV Stable, VOC free, hydrophobic, flexible, dries clear, resistance to any new growth of algae and lichen fungus, and incredible adhesion and scrubbable properties

## CURING AND DRYING TIMES

ColorKote requires warmer sunny weather in order to dry and cure. Drying time between coats is 30 mins to 1 hr, and ColorKote takes 7 full days to cure.

# WHAT IS A PROTECTIVE COATING?

A worker in a white hard hat and safety vest is on a yellow lift, painting the orange corrugated metal facade of a building. The building has several windows with dark frames. The scene is brightly lit, suggesting a sunny day.

# Don't paint it KOTE it

Much more than beautiful aesthetics!

Protective coatings, such as ColorKote, are formulated totally differently to traditional paints, which are focused on aesthetics! ColorKote will prevent degradation from the elements and other factors in the environment.

Protective coatings are important in maintaining the form, function, and properties of any surface as they provide a shield against the abrasive conditions of any environment.

# ColorKote Super-Paint

COVERS  
8 SQUARE  
METERS  
WITH  
1 COAT

\* Needs 3 coats

# ColorKote Super-Paint its the paint of the future

20 years and still protecting

Its easy to be misled by statements of long term guarantees on paint tins!  
Has anyone read the small print on the written guarantee? You may well be shocked!

# Connected to Nature

ColorKote is an eco-friendly,  
UV Stable, human and pet safe  
super-paint

# No stones left unturned...

We source the best raw materials to ensure the formulation and creation of our products are made with the highest quality components

## Connecting to our market

Our formulation was designed after countless hours of communicating with our customer base to ensure we provide the perfect paint for the most challenging applications!

# The multiple ways to apply ColorKote Begins with...

## THE BRUSH - Brush it on!

There is an art to using a paint brush so as to minimise brush marks, like only paint in the cool!

# COLOURS...

Pigments and pigmenting or tinting or adding colours and shades of colours to a paint is not a walk-in-the-park!

Yet, we offer the service of tinting to any colour within reason as our method is manual and expertise is relatively new to the world of mastering colour matching

Believe it or not, but we offer a transparent paint for a thousand applications!

We also offer a matte or satin finish other than our standard high gloss

YOU CAN USE A ROLLER

A person wearing a white protective suit and a respirator mask is holding a spray gun. The person is standing in front of a brick wall. The spray gun has a white container attached to it. The person's hands are visible, and they are holding the spray gun with both hands. The background is a brick wall. The overall scene is a professional painting or coating application.

# SPRAY IT!

Spray offers  
the best  
surface finish!

# Technical Information - ColorKote...

ColorKote is not a simple polymer readily found in the paint industry!

Its a combination of elements designed to perform in arduous conditions and onto difficult substrates.

Unlike almost all paints, ColorKote does not contain water or filler powders which compromise the efficacy of a protective coating.

Instead we invented a product made up of over thirteen earth friendly elements which when blended under the proprietary and secret methodologies in our factory, produce a one-of-a-kind futuristic protective coating which brings beauty and substance to the surfaces of your assets, ensuring a long and well preserved lifespan in the harsh South African weather conditions

After over forty years in this industry and having changed the nature of waterproofing coatings way back in the early 1980's I have now combined this experience with an insatiable need to improve and invent so as to bring to our market the very best products money can buy.

We have thousands of extremely complimentary customers/friends within and outside of South Africa's borders.

We offer unparalleled expertise upon which our contractors rely for the successful completion of their projects.

Please ask us for a TDS if you want to know pH, MFFT and other values.

# Technical Information - ColorKote Continued...

Because this is not your everyday paint to which you may be accustomed, we offer some tips and tricks to all our new customers and contractors...

Painting in the midday sun onto a hot-as-hell surface is not the course of great wisdom, why?

Any paint requires some time to form a bond with the surface and particularly with water based paints, they need time to penetrate and adhere whilst still "wet". If the surface is so hot it will "cure" the paint before it has time to adhere!

DTM is short for Direct To Metal and ColorKote is DTM. it is recommended for machinery and all metal structures indoors and outdoors.

ColorKote can be used as a roof paint, or a waterproofing medium on walls, roofs, gutters, garden furniture, wood, plastic, glass, aluminium and concrete. Our transparent version can be painted on tiles, bricks, showers etc.

Are you beginning to see why this is a paint from the future?

This is not a product of AI (Artificial Intelligence), no, it is a product of RI (Real Intelligence)!

# SAMPLES

If you are not convinced by all the hype heretofore, then ask for a small sample.

“Seeing is believing”

We pay for the sample you pay for the transport - that's fair on both of us.
